

Pilots are good people!

Besides giving you the opportunity to be an equal share owner in five well-maintained aircraft, the Naperville Flying Club is a *club*, in the traditional sense. We enjoy each other's company! Besides our monthly meetings and Tuesday Maintenance Nights, the Club has social events throughout the year. The Flying Foursome Golf Challenge on summer weekends, the annual Summer Picnic, and the Holiday Party are just a few of the non-flying activities which enhance the Naperville Flying Club membership experience!

The Naperville Flying Club

Why pay to just rent an aircraft, when you can *own a share* in 5 aircraft, and enjoy all the benefits of ownership—without the downside risks? You fly more economically, especially on cross-country trips. No daily rates to pay while you are at your destination, just flying time.

**There is no better
way to fly!**

Come Fly With Us!

NFC's Piper PA32-301 Saratoga, N114EL, landing at Naper Aero (LL10)

The Naperville Flying Club is based at Naper Aero (LL10), a well maintained and recently upgraded field located near Rt 59 and 83rd Street in Naperville. We are a group of pilots, instructors, and students, who share a common bond—the love of flying. Our club includes all types of pilots, from pre-solo students to ATP's with thousands of hours in the air. Many of our pilots are currently pursuing advanced ratings, and our diverse fleet insures that whatever your skill level, we have a plane that will meet your needs. A most recent edition is a pristine 1981 Piper Saratoga. Featuring a six-seat leather interior and an IFR certified, autopilot-coupled Garmin 430 moving map GPS with datalink weather, it is the perfect family cross-country airplane. So whether you're an experienced pilot, or someone who's always dreamed of getting a private pilot's license, you won't find a better flying experience than the Naperville Flying Club. Visit our website at: www.napervilleflyingclub.com

Our Aircraft

We have five aircraft:

N79955 – 1969 Cessna Skyhawk
N9636V – 1975 Cessna Skyhawk
N30008U – 1979 Piper Archer
N9348Y – 1961 Beechcraft Debonair
N114EL – 1981 Piper Saratoga

All of our aircraft are IFR certified. Members pay wet hourly rates generally about 1/2 of what FBO rental rates are.

Looking To The Future

Although the Naperville Flying Club has been in existence for 50 years, we are embracing the exciting changes that are currently taking place in general aviation aircraft and avionics. In addition to an ongoing program of updating our aircraft cosmetics, (paint, interior, and glass) we recently initiated a series of avionics upgrades. Our 3 advanced aircraft, the Piper Archer, Beechcraft Debonair, and Piper Saratoga currently have IFR-certified Garmin 430 color moving map GPS/Comm units as well as Garmin audio panels, King KX155

Instrument panel in N3008U, our Piper Archer II

digital flip/flop Nav/Comms, and coupled autopilots. In addition, our high-performance aircraft—the Debonair and Saratoga—have satellite data link weather and graphic engine monitors with digital fuel flow. Cessna Skyhawk N9636V features a Garmin 250XL moving map GPS/Comm.

For the future, our plans include the addition of Stormscope lightning data to the weather features of our cross-country aircraft. Participate in our weekly maintenance nights (Tuesdays 4 to 7 pm), learn more about the aircraft and help keep the Club's flying costs low. It's an exciting time to be a member of The Naperville Flying Club!

NFC's Beechcraft Debonair, N9348Y

Membership

The Club is limited to 50 members. Each of the 50 members own an equal equity share in the club's aircraft. Each share currently costs \$4,300. All of your equity is returned to you if you resign from the Club and your share is sold to a new member.

In addition to the one-time purchase of an equity share, members pay monthly dues of \$133 per month. These dues cover the fixed costs associated with the club and the aircraft. For more information, visit our website at: www.napervilleflyingclub.com
